ST Telemedia Global Data Centres (STT GDC)
Singapore

STT GDC is a fast-growing data centre provider in Singapore. Our current footprint in the city consists of 5 data centres strategically located in the East and West of the city, providing multi-site redundancy. STT GDC's state-of-the-art data centres are built to the industry's most stringent requirements for energy efficiency, operations and service delivery. Delivering tailored colocation solutions, connectivity and support services, we offer scalability and flexible commercial terms that best meet customers' current and future colocation needs.

India

As a market leader in India for colocation services with the largest footprint of data centres in the country, we currently manage India's largest Raised Floor Area and critical IT load, with 14 facilities spread across 8 cities that are carrier-dense interconnections. Operating since 2004, we have a staff of over 500 skilled professionals involved in design, build and operations serving over 1400 customers including many Fortune 500 companies today.

GDS - Is a leading developer and operator of high-performance data centers in China, with a 16-year track record in colocation and managed services. GDS is now serving over 400 customers consists predominantly of large Internet and Cloud service providers, financial institutions, telecommunications and IT service providers, and large domestic private sector and multinational corporations. Our facilities are strategically located in China's primary economic hubs, covering an aggregate net floor area over 60,000 sqm in service, and an aggregate net floor area over 25,000 sqm under construction.

VIRTUS Data Centres - The UK's fastest growing data centre provider that owns, designs, builds and operates the country's most efficient and flexible data centres. VIRTUS leads the industry with award winning innovation in hyper efficient, ultra-high density and highly interconnected facilities.
