

VIRTUS Data Centres

Europe's Trusted,
Reliable, Resilient
and Responsible
Data Centres

VIRTUS
Data Centres

VIRTUS is the UK's largest and one of Europe's fastest growing data centre providers

ABOUT VIRTUS

VIRTUS specialises in the design, construction, and operation of world-leading data centres, allowing our customers to focus on their core business without the burden of managing their IT infrastructure.

Our customers' digital infrastructure provides the world with the systems that everyone relies on to live and work. VIRTUS Data Centres enable these systems to be available, connected and secure.

OUR INVESTORS

VIRTUS is a well-funded data centre owner-operator supported by ST Telemedia Global Data Centres and Macquarie Asset Management. The senior management team at VIRTUS are also shareholders in the business and are closely supported by dedicated teams from both ST Telemedia Global Data Centres and Macquarie as part of a strategy to build and operate a high quality, energy efficient European data centre portfolio.

ST Telemedia Global Data Centres (STT GDC) is one of the fastest-growing data centre providers with a global platform serving as a cornerstone of the digital ecosystem that helps the world to connect. Powering a sustainable digital future, STT GDC operates across Singapore, the UK, Germany, India, Thailand, South Korea, Indonesia, Japan, the Philippines, Malaysia and Vietnam, providing businesses an exceptional foundation that is built for their growth anywhere.

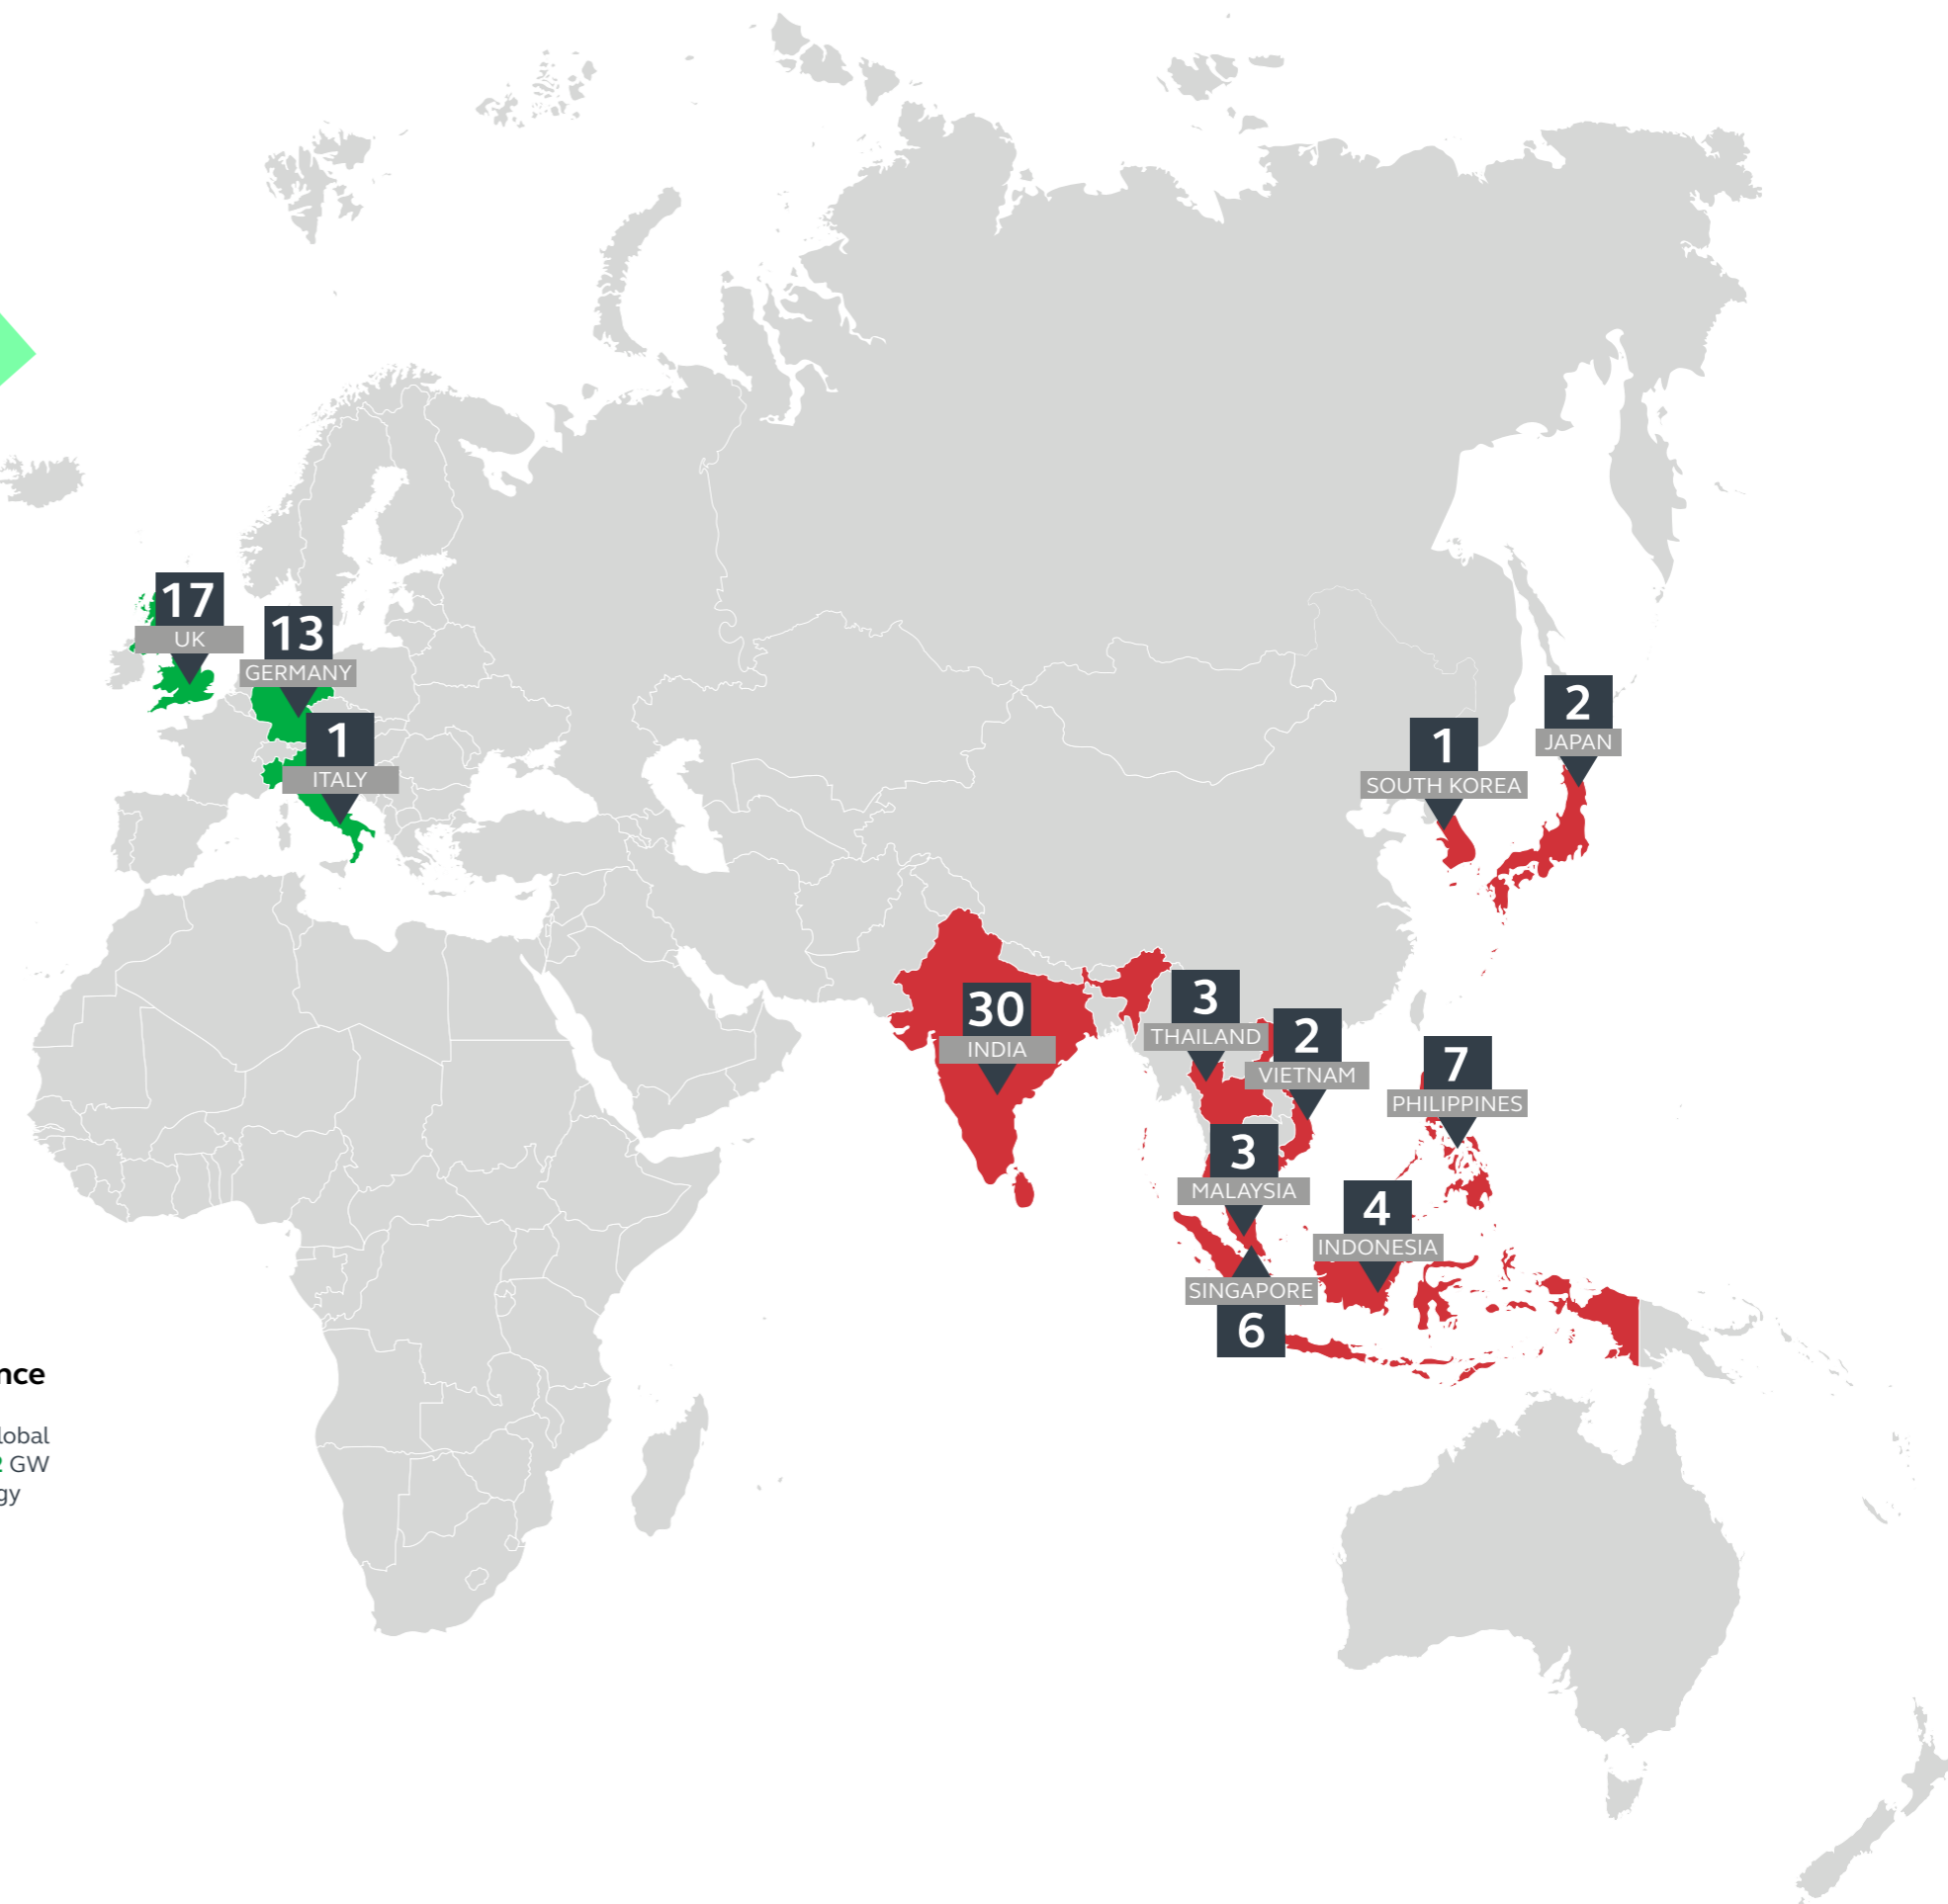

Macquarie Asset Management (MAM) is a global asset manager that aims to deliver positive impact for everyone.

MAM provides investment solutions to clients across a range of capabilities in Private Markets and Public Investments, including infrastructure, green investments, agriculture and natural assets, real estate, private credit, asset finance, equities, fixed income and multiasset solutions.

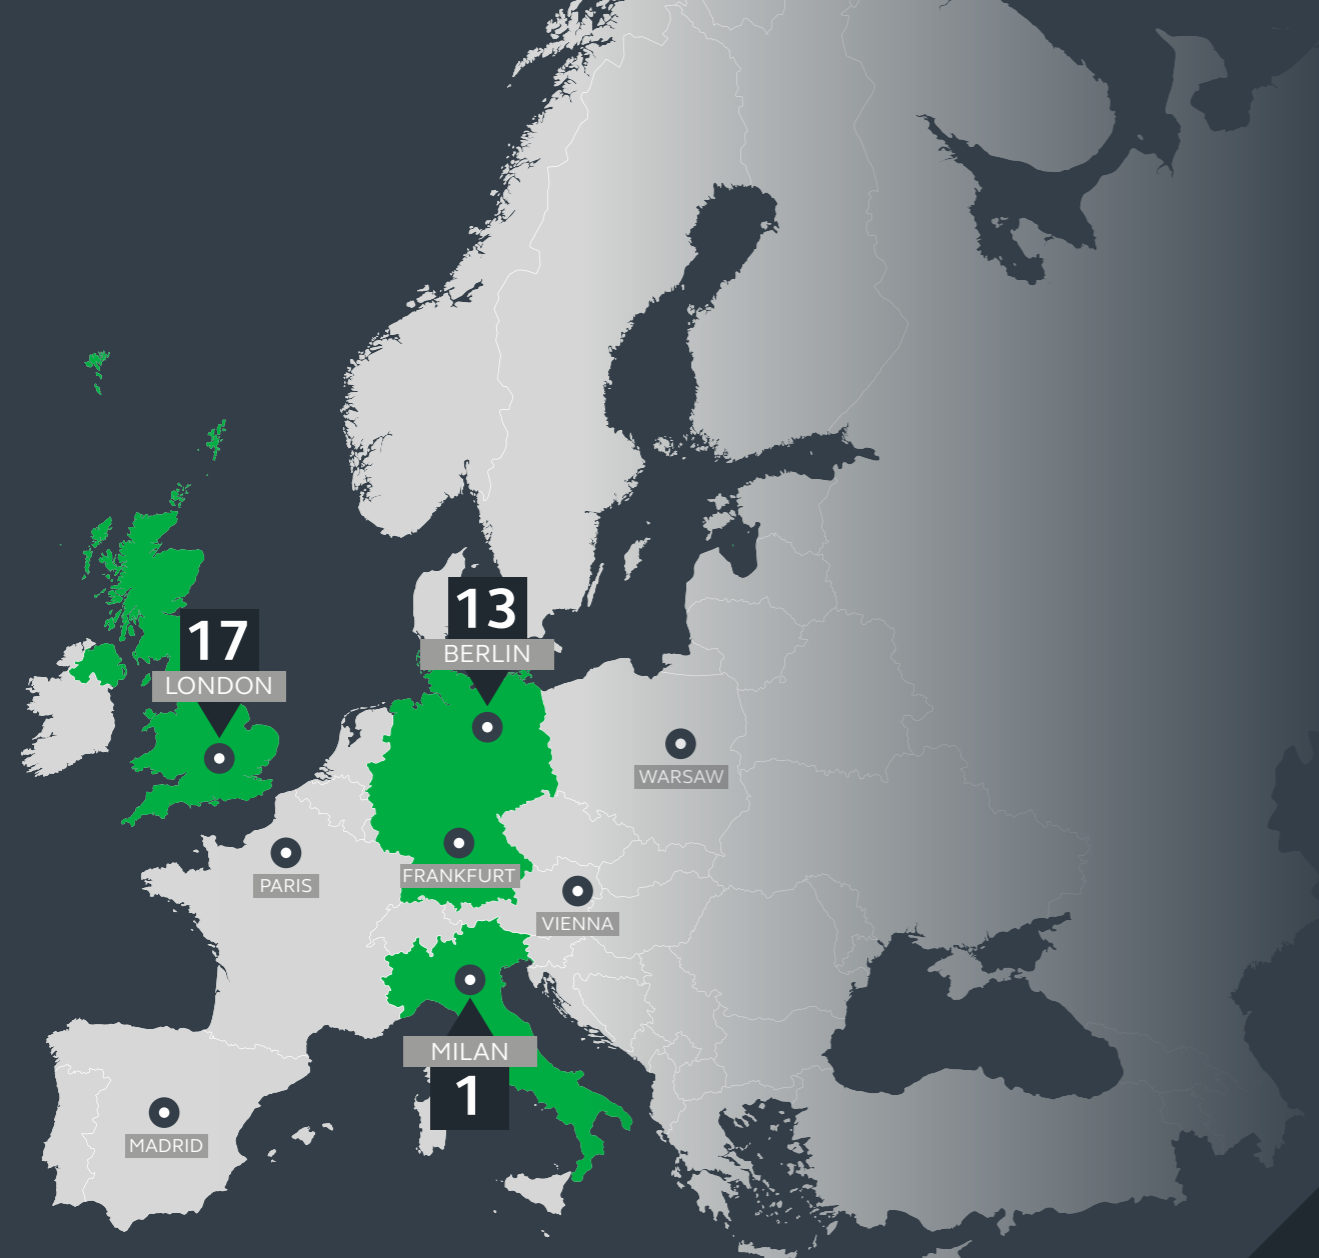

A Global Carrier-Neutral Platform with over 100 facilities

A Global Carrier-Neutral Platform with Strong Local Presence

VIRTUS Data Centres, as part of ST Telemedia Global Data Centres' (STT GDC) global platform with presence in **20+** business markets and with **100+** assets and over **2 GW** of IT load, provides purpose-built and carrier-neutral facilities that focus on energy efficiency and flexibility to meet customers' requirements.

Includes data centres under construction

VIRTUS Europe

VIRTUS' European expansion consists of multiple sites across key primary and secondary European markets

UK | London | 303 MW | 17 data centres

Germany | Berlin | 260 MW | 13 data centres

Italy | Milan | 42 MW | 1 data centre

Includes data centres under construction

SOLUTIONS

Rack

Best suited to customers with a small number of racks that can be accommodated within a shared hall environment. Ideal for customers who need to keep their installation and configuration costs to a minimum.

Cage/Pod

Customers with mid to large size requirements who want additional installation or configuration options, can be deployed in a caged environment within a shared data hall and still benefit from minimised cost of installation.

Data Hall

Customers with larger deployments or with a need to configure their data hall to fit specific requirements, will appreciate the flexibility, where they have additional control over their deployment installation, including the option of dedicated plant.

High Performance Computing

VIRTUS specialises in hosting High Performance Computing (HPC) solutions. Our data centres provide the perfect environment for HPC deployments of any size, utilising the latest in cooling technology.

AI Ready

VIRTUS' AI Ready data centres are designed from the very outset to support the unique requirements of AI workloads. With over a decade's experience designing and operating Europe's most innovative, efficient and flexible facilities.

Build to Suit

At VIRTUS, we know that organisations of all sizes need true flexibility, which is why we don't put hard definitions behind our offering, instead working with you to create a bespoke solution.

WHY VIRTUS

Our dedicated Solutions Team will work with you to create your perfect data centre environment. VIRTUS' facilities are modular by design.

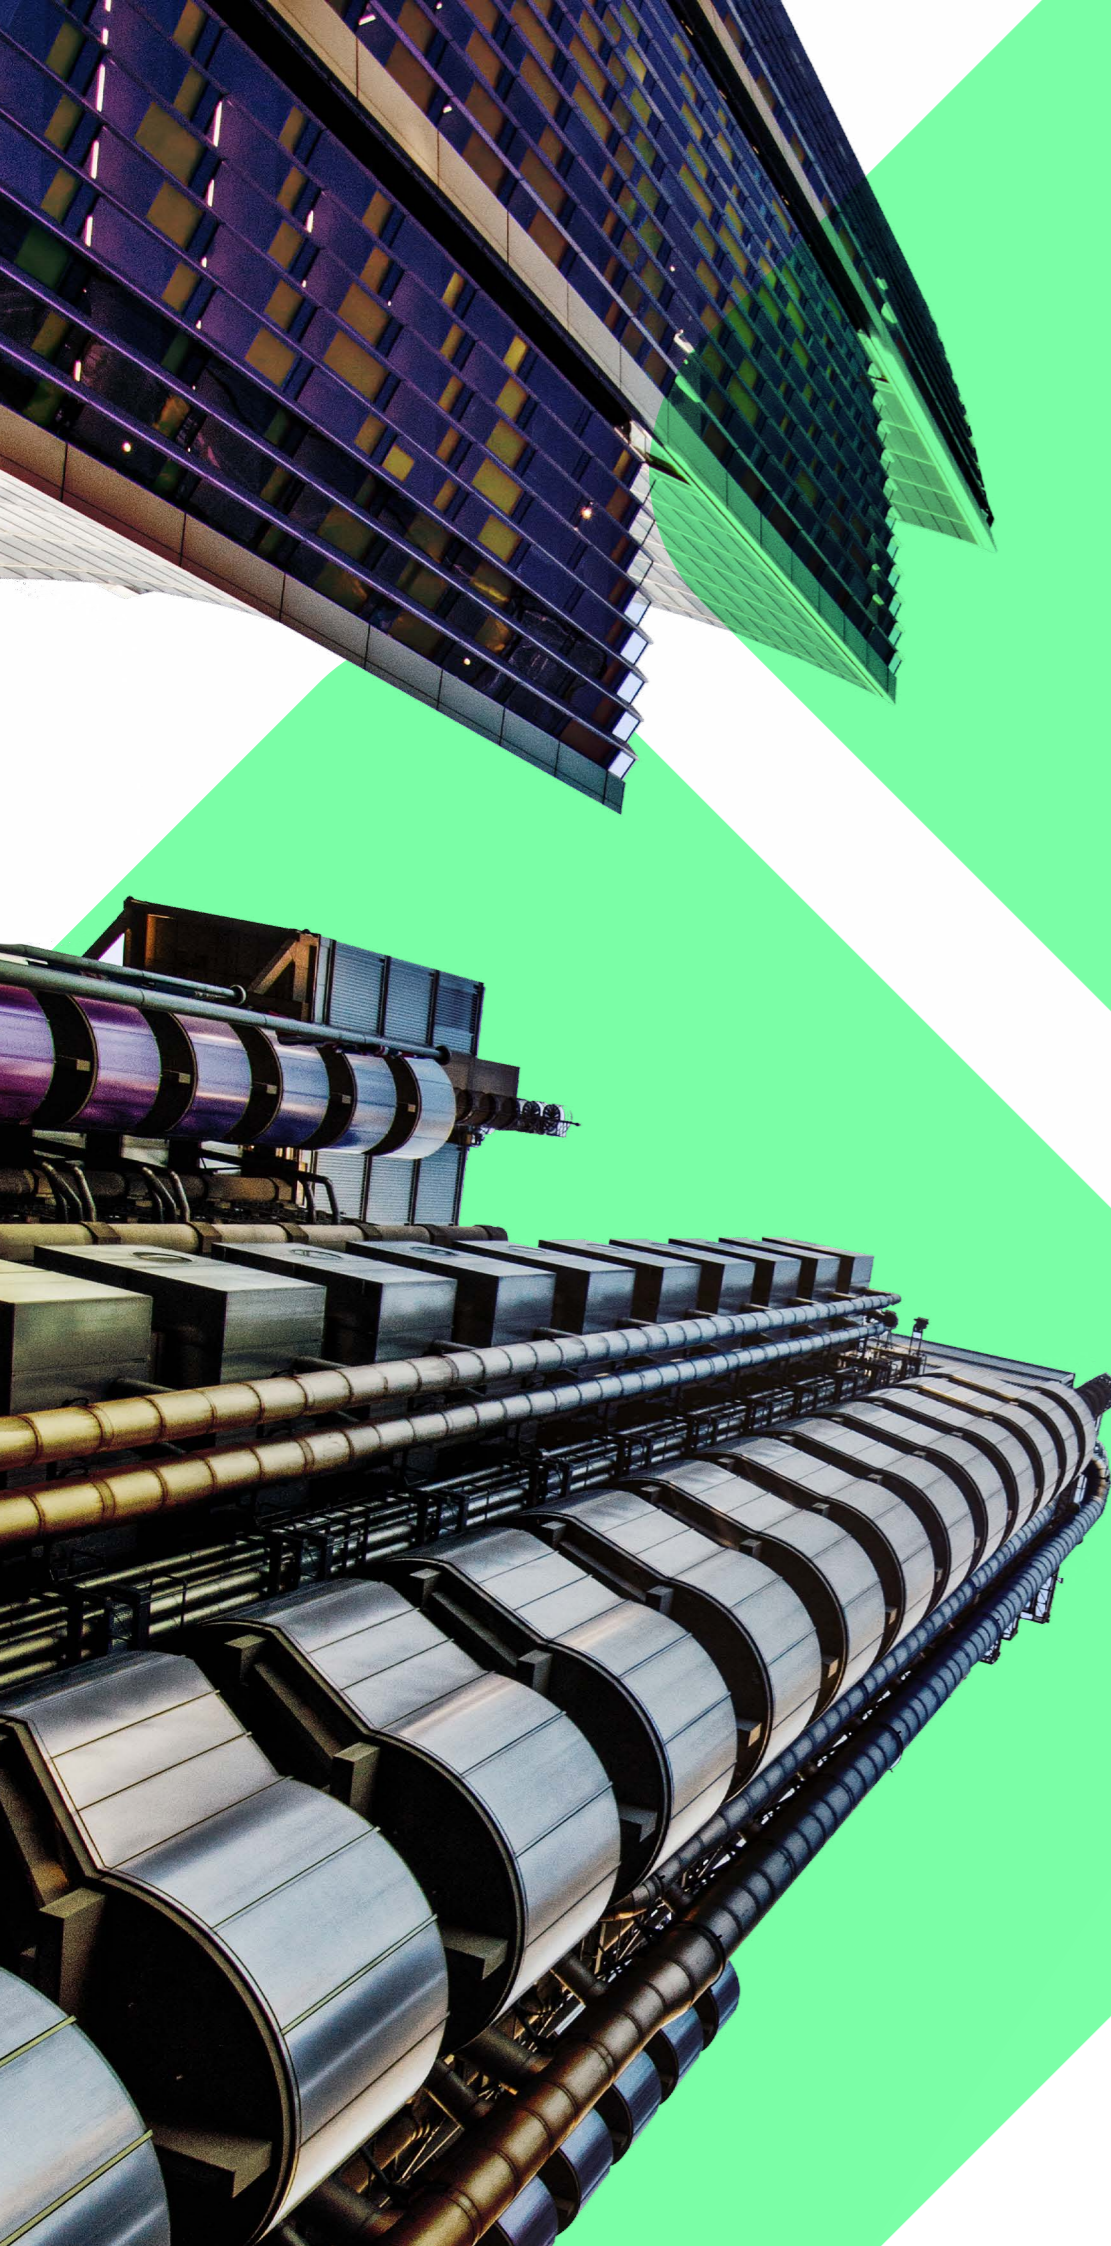

This, combined with truly flexible commercials, allows customers to grow in a cost effective and unrestrictive environment.

Agile Commercials

We enable you to grow and shrink your deployment in line with your business needs.

Cater For All Sizes

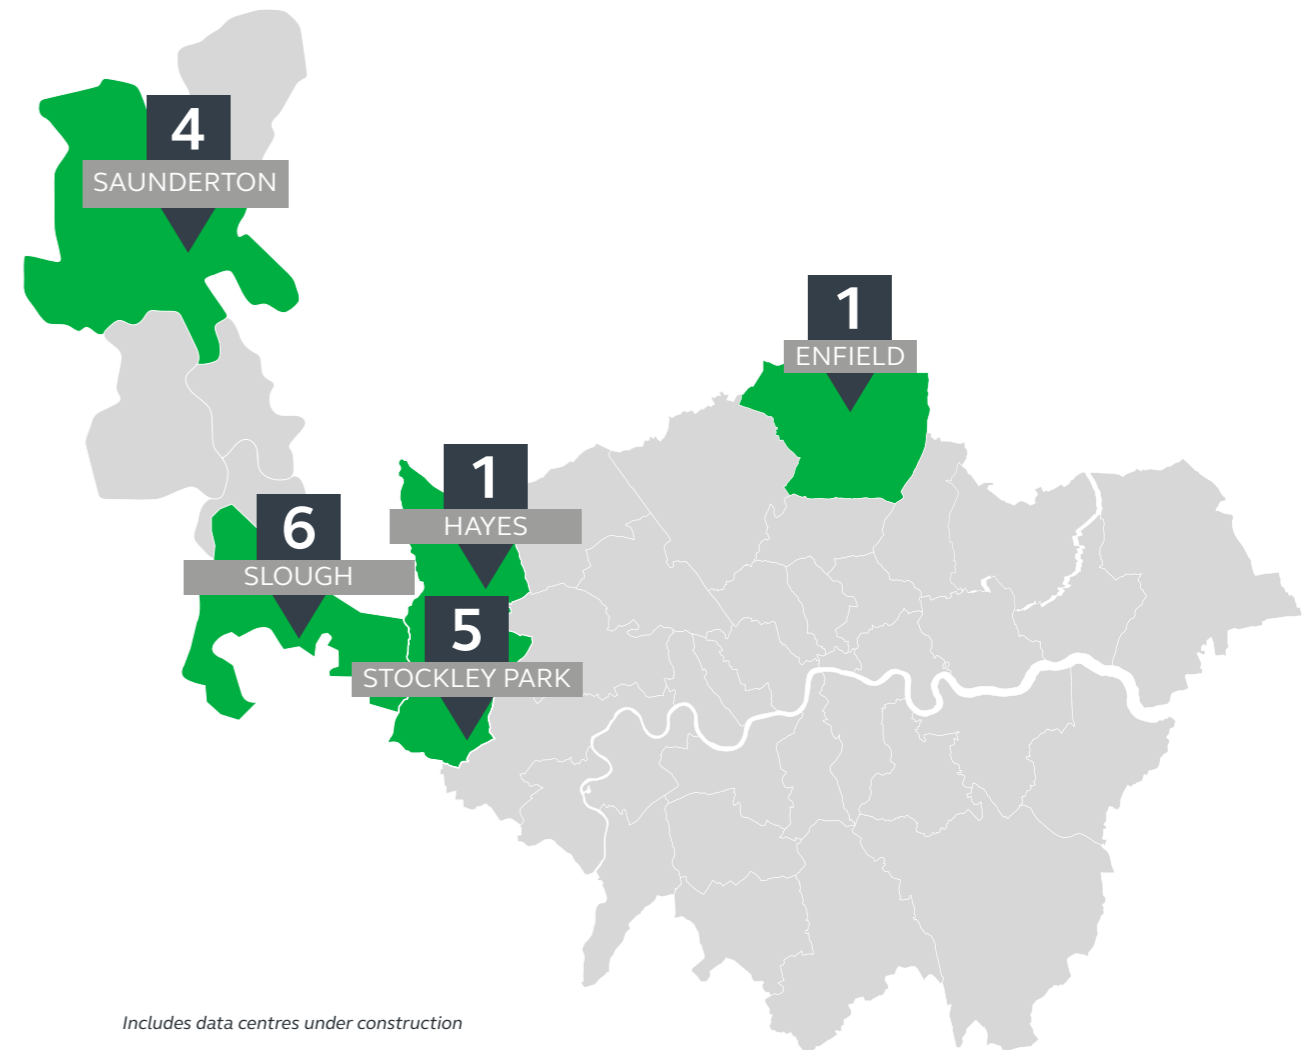

From start-up to large hyperscalers, and everything in between, VIRTUS works with all customers to find the perfect solution.

VIRTUS UK LOCATIONS

At VIRTUS, our London data centres are close enough to both The City of London and other London data centre ecosystems, allowing for mission critical data replication services, but far enough from both to satisfy physical disaster recovery requirements.

UK | London | 303 MW | 17 data centres

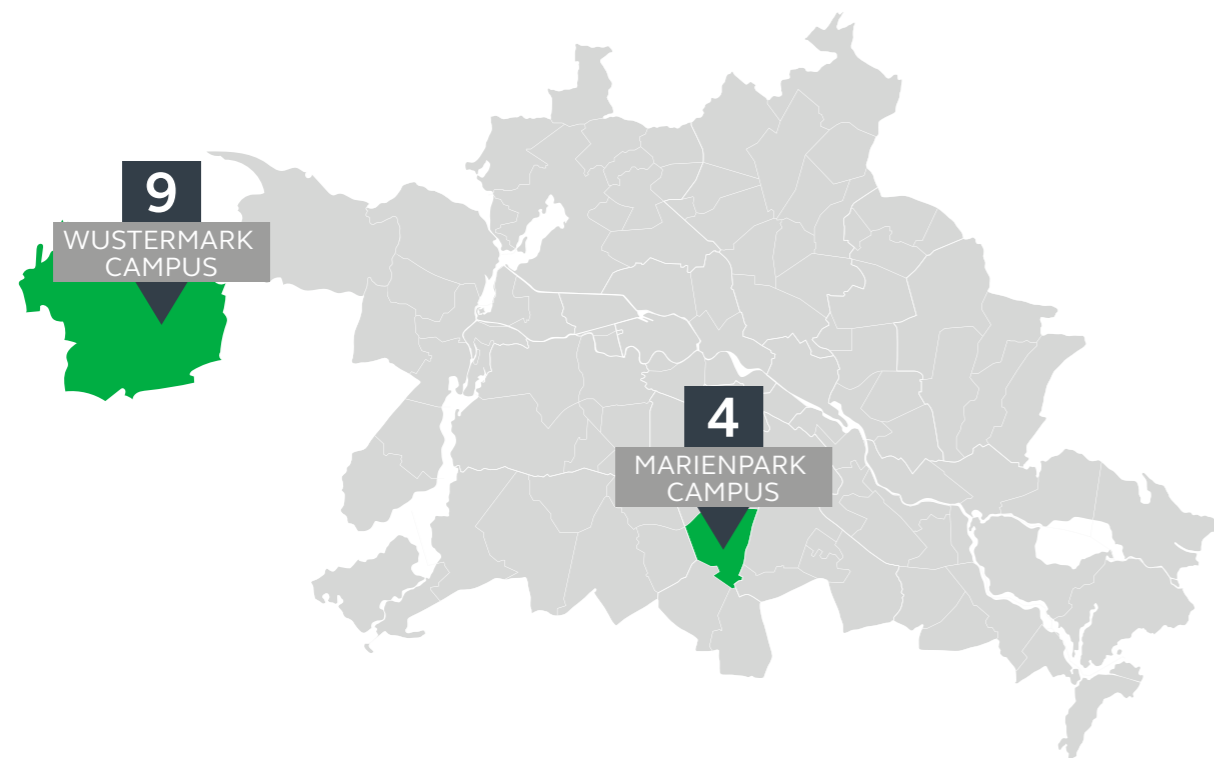

Includes data centres under construction

VIRTUS GERMAN LOCATIONS

A new benchmark in mega scale data centre capacity for cloud and AI in Europe

Our Germany data centres are situated in and around Berlin's metro area. 13 state of the art AI Ready facilities over two campuses. Designed with the latest in cooling technologies, these data centres are built for the future.

Germany | Berlin | 260 MW | 13 data centres

Includes data centres under construction

Protecting the environment is one of VIRTUS' top priorities. That's why we only ever use truly renewable energy from wind, hydro or solar sources.

RENEWABLE ENERGY 100% GREEN

By using only 100% renewable energy in 2024, VIRTUS saved around 210,000,000 kg of CO₂. VIRTUS is dedicated to achieving net zero emissions on all reportable activities by 2030. Because we know that data centres consume vast amounts of power, we know it's our responsibility to minimise the environmental impact of all of our sites.

Since 2012 we've been procuring our power from 100% renewable sources, meaning we are completely carbon neutral on power consumption for our entire data centre portfolio.

CERTIFICATION

High quality is at the heart of everything that VIRTUS does, from our connectivity to our security and our communal areas. Hence VIRTUS takes industry certification seriously. We know that attaining and maintaining leading industry awards and accreditations makes VIRTUS a very low risk option for customers to deploy their IT.

Quality Credentials

VIRTUS has a variety of ISO accreditations, authorised and certificated by Alcumus ISOQAR
